Last snapshot: 03/17/2020 5:31pm ?

This page allows you to build and customize your data collection instruments one field at a time. You may add new fields or edit existing ones. New fields may be added by clicking the **Add Field** buttons. You can begin editing an existing field by clicking on the **Edit** icon. If you decide that you do not want to keep a field, you can simply delete it by clicking on the **Delete** icon. To reorder the fields, simply **drag and drop** a field to a different position within the form below.

Variable: time\_zone

**What time zone do you live in?**  
\* must provide value

[Add Field](#) [Add Matrix of Fields](#)

Variable: country

**What country are you in?**  
\* must provide value

[Add Field](#) [Add Matrix of Fields](#)

Variable: state

**State/Territory/Province? (optional)**

[Add Field](#) [Add Matrix of Fields](#)

    

Variable: age1

**Age:**  
\* must provide value

Add Field

Add Matrix of Fields

Variable: sex\_gender

Per NIH, research findings may be influenced by sex and/or gender, and it is important to use these terms correctly. Women and men are characterized by both sex and gender, as highlighted in the Institute of Medicine report entitled "Exploring the Biological Contributions to Human Health: Does Sex Matter?" (2001).

Sex is a biological variable defined by characteristics encoded in DNA, such as reproductive organs and other physiological and functional characteristics. Gender refers to social, cultural, and psychological traits linked to human males and females through social context.

Add Field
